In addition to the good quality [video of the keynote address](#) at CFUNITED, here is an audio only export of the keynote in mp3 format:

[Audio mp3 track of the CFUNITED Keynote on June 29th \[25MB\]](#)

Ben's microphone wasn't tuned as well as Tim Buntel's, so while Tim comes in loud and clear, Ben is a little difficult to follow. The audio for guest Amit who demos a CF7 app was lacking in volume entirely, so it barely comes through here. Simeon Bateman's talk on CFEclipse comes through very well.

- 0:00 Tim Buntel introduces himself and Ben Forta
- 6:30 - 15:00 Ben Forta begins discussion of what's new in CFMX 7
- 16:40 Introduction to Amit Yathirajadasan of Georgetown University who demos CFMX 7 app
- 17:45 Amit begins, but is generally inaudible
- 27:20 Tim Buntel recaps Amits talk and segueways to CFMX future
- 31:20 Ben Forta introduces CFMX 7 updater, code named Merrimack
- 33:30 Start of CFEclipse discussion by Tim Buntel
- 39:40 Simeon Bateman of the CFEclipse Project joins the stage
- 46:00 Tim Buntel and Ben Forta introduce ColdFusion MX 8, codenamed Scorpio
