I was searching through my email for something today, and I came across my application to **CDIA** where I wrote this in the **Personal Objective** section almost two years ago.

### **Why have you chosen to pursue an education in the field of Digital Imaging Arts?**

Through achievement, motivation, and serendipity I've been fortunate to have earned an esteemed position as software quality assurance engineer at Adobe Systems. Within this vibrant, professional atmosphere my personal growth as a serious amateur photographer has accelerated significantly.

At this nexus, I wish to seize the opportunity to expand my skills horizontally by bridging my experience in rich internet development with the digital imaging arts and professional photography.

### **What do you hope to achieve by enrolling in the program at the Center for Digital Imaging Arts?**

With the completion of a certificate in Professional Photography I will have formalized a long standing, deep, personal ambition which will allow me to thoroughly exercise my passion with technical excellence.

Further, I strive to achieve a role at Adobe where I can consult with, collaborate with, and guide Adobe customers towards their own creative endeavors and solutions. Knowledgeable in the diverse array of photography, digital imaging, and next generation web application development I will be able to translate my success into the success of my customers, my colleagues, and my company.
