

Configuring Oracle Thin Client in CFMX

Posted At : July 16, 2003 1:05 PM | Posted By : Steven Erat

Related Categories: Java, ColdFusion

For CFMX Enterprise and Professional

1. Save the **classes12.zip** file to {CFMX_HOME}WEB-INF\lib
2. Edit the JVM Java page in CFAdmin,
3. Add {CFMX_HOME}WEB-INF\lib\classes12.zip to the class path
4. Restart the CFMX App server
5. Add datasource using the "other" driver
6. JDBC URL: jdbc:oracle:thin:@[dbservername]:1521:[SID]
7. Driver Class: oracle.jdbc.driver.OracleDriver
8. Configure username, password, submit

For CFMX J2EE (WebSphere in this case)

1. save the **classes12.zip** file to {WAS_HOME}AppServer\lib
2. open the WAS admin console
3. add {WAS_HOME}AppServer\lib\classes12.zip to the class path in WAS Console, submit, then save changes.
4. restart the WAS server
5. Add datasource in CFAdmin using the "other" driver
6. JDBC URL: jdbc:oracle:thin:@[dbservername]:1521:[SID]
7. Driver Class: oracle.jdbc.driver.OracleDriver
8. Configure username, password, submit
