Take a look at an aerial **phonecam** view of life in my cube. This has been my 5th cube in the last 4 years as I recall, but fear not as I've laid down roots. Don't be fooled by the austere haze of the flickering fluorescent lights... I'm surrounded by bountiful amenities and sheer opulence.

To douse my excitement I sometimes have a look out my window at home through **my webcam**. No sir, no **Segue scooters** or **plasma screens** here. The longest walk is to the coffee machine, and I prefer to have **Ananova** or **Ramona** read my email to me.
