Wed Jul 01 2:59 PM

Thx [@fuzzyorange](#) . Looks like a known condition with its own JVM flag <http://bit.ly/UYzMh> -XX:-UseGCOverheadLimit

Wed Jul 01 2:56 PM

[@dfgrumpy](#) Thx. Its the "GC overhead limit exceeded" part I've never seen before. Researching now. Might be a new verbiage, nothing more.

Wed Jul 01 2:50 PM

First time I've ever seen this in ColdFusion: java.lang.OutOfMemoryError: GC overhead limit exceeded

Wed Jul 01 2:48 PM

[@awest](#) [@cfaddict](#) minus ~30% in taxes of course.

Wed Jul 01 2:37 PM

[@mvanleest](#) Linux, CF80 RedHat 5. I'm thinking its a large cf.registry file for client storage since cf startup pauses at "Starting client"

Wed Jul 01 2:36 PM

[@cfaddict](#) I think it comes down to good content (you've got that) and a good SEO strategy according to the Google Bible

Wed Jul 01 2:14 PM

[@cfaddict](#) There was a time when I was earning almost \$4k/yr with Adsense. Down to 1k now.

Wed Jul 01 1:46 PM

[@bigmadkev](#) Yeah, dealing with client system. The classloader issue regards slow \*app\* startup not slow cf startup. <http://bit.ly/6Dw9p>

Wed Jul 01 1:30 PM

[@umAndy](#) Nope, its CF8.0 JVM 1.6.0\_01. I think its due to a very large cf.registry file. CF startup pauses on "Starting client..."

Wed Jul 01 1:02 PM

CF tweeps: Looking for reasons of slow CF 8 server startup (not to be confused with slow application startup). Clues? [#coldfusion](#)

Wed Jul 01 12:43 PM

[@cfjedimaster](#) There's a way to kick the other users off.. Used to use it couple years ago, but can't remember right now.

Wed Jul 01 11:55 AM

I've noticed that with the FF3.5 upgrade my gmail chat is wacked showing everyone offline. Load up Safari, they're all online

Tue Jun 30 7:30 PM

Asst Managing Editor Michele McNally oversees **#photog** for The NYT, on "The Future of Photography" <http://bit.ly/OgaT5>

Tue Jun 30 7:17 PM

RT **@fotozine**: RT **@mashable** Flickr2Twitter: Flickr Enters the Twitter Stream - <http://bit.ly/w7uzu> **#photog**

Tue Jun 30 5:02 PM

**@oticellos** There's a new checkbox in CF801 for "linked oracle" servers. Should be simple as that. The SID should be the RAC **#ColdFusion**

Tue Jun 30 4:46 PM

Until **#ColdFusion** documents the details of Oracle RAC support, refer to DataDirect doc for generic JDBC support for RAC <http://bit.ly/TcxSX>

Tue Jun 30 4:32 PM

A professional modeling agency in Boston is using Microsoft Document Viewer when reviewing images submitted from **#photog**'s. Unbelievable!

Tue Jun 30 3:30 PM

If you loved Leo Laporte in TechTV, you'll love this too: RT **@rmedina**: Watching <http://live.twit.tv/>

Tue Jun 30 2:33 PM

Hard to believe someone at a modeling agency would say 'I am just not that technologically advanced' about opening JPG files. **#photog**

Tue Jun 30 1:56 PM

Confirmed new "Enable Oracle linked servers support" is for Oracle RAC support in CF801. There's a bug to add documentation 4 the feature.
