In [Schoenhof's Foreign Books](#) in Harvard Square, I recently picked up a great English-Spanish Telecommunications Dictionary. Its a fantastic desk reference if you ever have a need to rewrite an application from one language to the other, as was recently done with this [English translation](#) of [FlashBlog](#).

[Diccionario de informática y telecomunicaciones](#) (ingles-español)

Author: Moreno Martı́n, Arturo

ISBN: 8434428865

Published: 2001

If you're wondering, Oreja de burro is listed as the translation for Pig's Ear where the definition is a recursive entity relationship. I can definitely say that I never heard of Pig's Ear ever used in informatics circles.
