

Blog In Black - Outstanding Breezo on Using Eclipse for CF, Flex, ActionScript, and SQL

Posted At : May 4, 2005 5:06 PM | Posted By : Steven Erat

Related Categories: Breezo, Flex, Meetup, ColdFusion, Computer Technology, Macromedia

I'd been considering finding a speaker to discuss Eclipse, CFEclipse, and related as an event at the Online ColdFusion Meetup Group, but Kai K tznig of [bloginblack.de](http://www.bloginblack.de) recently recorded a presentation on this.

Kai did an absolutely fantastic job providing a survey of multiple uses Eclipse for ColdFusion, Flex, ActionScript, and as a Database explorer through a discussion of slides and plenty of good demos and walkthroughs.

"Breezo session on Eclipse and how to use it with Macromedia technology"
